DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 6-8 in the reply filed on 2/24/06 is acknowledged. The traversal is on the ground(s) that claims of an application define the same essential characteristics of a single disclosed embodiment of an invention, restriction there between should never be required. MPEP 806.03. This is not found persuasive because Group I, claims 6-8, drawn to encrypting a signal using a random numbers, classified in class 380, subclass 44. Group II, Claims 10-12, drawn to apparatus for generating random numbers, classified in class 708, subclass 250. Encrypting a signal using a random numbers apart from being used with inventions of claims 10-12 in that, using random numbers to cipher a data can be implemented in many different aspect of cryptographic field such as random key encryption or cipher key management. Because these inventions are distinct for the reasons above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated as proper. These two separate classifications is an indication of burden on the examiner as reason stated above.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims 10-12 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action(37 CFR 1.144). See MPEP 821.01.

Allowable Subject Matter

3. Claims 6-8 are allowed.
